

Model "PM" STRAINER

PM Over-Screens are comparable to traditional Wire Mesh Over-Screens. They are available with similar opening sizes and open area percentages as wire cloths, but the materials of construction are very different. The material used to make PM Over-Screens is punched from stainless steel; it is not made of individual wire cloth. The PM Over-Screen cylinder ends are hemmed to provide a smooth, finished edge for the strainer element. All material is T316/T316L Stainless Steel.

- PM Over-Screen cylinder ends are hemmed to provide a smooth, finished edge for the strainer element
- Available clamp connections: 1.5" (38.1 mm), 2" (50.8 mm), 2.5" (63.5 mm) and 3" (76.2 mm)
- Model "PM" group of filters carry a Canadian Registration Number (CRN) for pressure applicable pressure ratings
